

Environmental policy

Vorwerk Autotec Srbija d.o.o., is a company that cares about environmental protection and is committed to providing its employees with a working environment within a clean and healthy environment.

For these reasons, we undertake to respect the following principles:

- We will comply with all relevant laws related to environmental protection as well as with regulations related to these areas.
- We will maintain work equipment and processes in accordance with the limits of emissions into the atmosphere.
- We will meet the goals related to environmental protection
- We will take into account aspects of environmental protection when implementing current programs, planning new programs and implementing investments.
- We will reduce the amount of waste, accident situations and their consequences, and encourage more efficient use of resources.
- We will implement preventive actions in order to avoid environmental pollution.
- We will provide such conditions in which all employees are aware of their responsibility in meeting and maintaining adequate conditions for environmental protection.
- We will inform the public and all employees about the principles of this policy and their obligations.
- Where the law does not provide adequate protection, we will adopt special standards to protect the environment.

Based on all of the above, Vorwerk Autotec Srbija d.o.o. undertakes to operate in accordance with the law and other requirements, meeting the objectives of environmental protection.

Preljina/Čačak, December 2021.
